

ADVANCED CRITICAL INFRASTRUCTURE PROTECTION

MGT-414

October 7, 2020

8:00 am – 4:00 pm

**Location: Blue Cross Blue Shield of NE
 1919 Ak-Sar-Ben Dr, Omaha, NE 68180**

DESCRIPTION:

The purpose of this management level course is to extend the knowledge, skills, and abilities and to formulate considerations for the resilience of business assets leveraging cross-sector partnerships. These considerations, as part of a resilience action plan, will enhance the whole community's ability to manage the risk associated with critical infrastructure protection efforts. Participants receive a template for presenting all of the relevant data for jurisdictional or regional resilience.

Major topics include:

- Describe the national strategy of resilience relative to the local partner role
- Describe the whole community approach relative to the National Preparedness Goal
- Identify and prioritize jurisdictional critical infrastructure assets and interdependencies across all Critical Infrastructure sectors
- Describe the purpose and components of a resilience plan
- Analyze asset and sector impact on jurisdictional resilience
- Develop options for sector-specific next steps for highest-priority sectors
- Develop a list of jurisdiction-level (regional) resilience actions

AUDIENCE:

- Critical Infrastructure owners, operators, and managers
- State, local, tribal and territorial government senior officials and managers
- DHS personnel
- Sector Specific Agency managers
- Other managers with critical infrastructure responsibilities
